RE: please support the local franchises that make PEG Access TV possible

Station: Access San Francisco (channel 29)

To: Federal Communications Commission

I am a staff member of a broadcast that is aired on Public Access and also a strong supporter of the Public Access TV station in San Francisco. This local public access station is very important to our non-profit organization because it is the only way we can afford the equipment and airtime to produce our own program which expresses our views which we feel helps to build our local city.

Local franchises make PEG (Public, Educational and Governmental) TV possible for American freedom and democracy to work because PEG TV makes it possible for everyone's opinions to be heard, regardless of their social class or financial status. Because commercial broadcast is so expensive, it eliminates 95% of the entire population and therefore the media and the opinions voiced is controlled by a monopoly (those with the most money).

I am a strong supporter of Public Access TV in San Francisco and I strongly urge the FCC to rule for the maintenance of local franchises.

Sincerely,

Barbara Cornejo
